

Meeting: 1003, Atlanta, Georgia, SS 19A, AMS Special Session on Mathematicians' Work on Mathematics Education

1003-97-190 **Frank S. Quinn*** (quinn@math.vt.edu), Mathematics, Va Tech, Blacksburg, VA 24061-0123.

Computer-based learning in the Virginia Tech Math Emporium.

The Emporium is a full-scale steady-state facility with more than 7,000 students a semester taking courses or tests and a help staff budget over half a million dollars. This talk describes how we got this point, where we hope to go from there, and opportunities for other institutions. (Received August 22, 2004)
