1003-D1-1313 **Joan Elizabeth DeBello*** (debelloj@stjohns.edu), 8000 Utopia Parkway, Jamaica, NY 11439.
The Link Between Mathematics and Sports and the Many Textbooks that Use Sports to Teach Mathematics Content. Preliminary report.

Almost any person can name a favorite sport or many favorite sports. Almost anyone can learn a mathematics subject if he/ she has interests in it that go way beyond theory and can see it applied to everyday activities. This presentation will focus on the impact and link between mathematics and sports. It will focus on the many textbooks out there that are developed to teach mathematics content while using everyday past times and sports. (Received October 04, 2004)
