

1014-M1-1398 **Douglas Drinen*** (ddrinen@sewanee.edu), 735 University Ave, Sewanee, TN 37383-1000. *Paired comparison ranking systems: an old topic and a new application.* Preliminary report.

Many algorithms exist for taking a collection of game scores and generating a set of rankings of the teams involved in those games. In this talk we present a new application of these methods. Namely we will discuss modifying these algorithms so that they take a collection of individual player statistics and generate a set of rankings of the players involved. (Received September 28, 2005)
