Presser** (kjpres@ship.edu), Shippensburg University, 1871 Old Main Dr., Shippensburg, PA 17257. *Transitioning to College Mathematics - Creating a Program to Help Developmental Level Students Succeed in College Level Mathematics*. Preliminary report.

Our talk will focus on the issues involved in creating a program at the university level to address the widely varying needs of developmental students. We will examine these issues from at least these viewpoints: course content, course delivery, and course context within the broader curriculum. We will present techniques that we have successfully employed as well as the program issues that we continue to struggle with. (Received September 22, 2006)
