1023-Q1-381   **David Scott*** (`scott@ups.edu`), Department of Math/CS #1043, University of Puget Sound, 1500 N. Warner St., Tacoma, WA. *A More Student Friendly Definition of Limit.* Preliminary report.

A slight change in the wording of the usual definition can make it easier for students to craft limit proofs and understand the difference between uniform and pointwise limits.
