Balakrishnan Variyath Uckath* (uckath@yahoo.com), Professor of Mathematics, Eritrea institute of Technology, Ministry of Education; P.O. Box No:1056, Asmara, Eritrea. *Primes and twin primes near some large numbers.*

We obtain, explicitly, primes and twin primes near some large numbers. This would enable one to compute very large primes and very large twin primes, yet not discovered. We expect some very gigantic twin primes and prime triplets also to be found using the method we describe. The technic used is simple and ready to use in computation. (Received September 26, 2006)
