Barnabas B Hughes* (barnabashughes@hotmail.com). *Riches from the Middle Ages.*

An immobile circular slide rule from the Jewish quarter, the challenge for truth from the Moslem stance, beginning to compute with signed numbers from a European Christian: these vignettes will be shared enriched with another four or five from a treasury of medieval mathematics (800 - 1470), including the finite birth of infinite series. (Received September 14, 2012)
