Bancroft St., Toledo, OH 43606. *Axler-Zheng type theorem on domains in \mathbb{C}^\times .*

Axler-Zheng theorem characterizes the compactness of finite sums of finite products of Toeplitz operators acting on the Bergman space on the unit disk in terms of the Berezin transform of the operators. We prove a version of Axler-Zheng's theorem for a class of smooth bounded pseudoconvex domains in \mathbb{C}^\times . (Received September 04, 2013)
