

1096-G5-2172 **Dave I. Kennedy*** (dikenn@ship.edu), Shippensburg University, Department of Mathematics, Shippensburg, PA 17257, and **Ben Galluzzo** (bjgalluzzo@ship.edu), Shippensburg University, Department of Mathematics, Shippensburg, PA 17257. *How Math Can Lead You to Fantasy Football Glory.*

Fantasy Football provides a rich source of data for mathematical reasoning. We'll explore how to develop a mathematical model for drafting an expert-beating fantasy football team using concepts found in undergraduate math courses, particularly introductory statistics. Attention will also be given to the process of testing and improving the model. (Received September 17, 2013)
