

1106-14-1838 **Holly Krieger*** (hkrieger@math.mit.edu). *Unlikely intersections in complex dynamics.*

I will present an analogue, proposed by Baker-DeMarco, of the André-Oort conjecture applicable to moduli spaces of dynamical systems. I will discuss progress on this conjecture and some connections to model theory with unlikely intersection problems in complex dynamics. (Received September 15, 2014)
