

1106-G1-2077 **Jeremy Case*** (jrcase@taylor.edu), 236 W. Reade Ave., Upland, IN 46989. *My Favorite MAA Articles for Linear Algebra*. Preliminary report.

Linear Algebra has many wonderful applications which are not always explored in depth in textbooks. Furthermore, a Linear Algebra course often services not just mathematics majors but those in other areas such as education, economics, and computer science. Assigning journal articles can be a way of meeting these diverse needs, but beginning undergraduates often have difficulty reading them. This talk will not just provide a list of favorite MAA articles but will suggest strategies for incorporating journal articles into a Linear Algebra class. (Received September 15, 2014)
