

1116-16-1948      **M Susan Montgomery\*** ([smontgom@usc.edu](mailto:smontgom@usc.edu)). *Values of Frobenius-Schur indicators for Hopf algebras.*

Frobenius-schur indicators are important for studying representations of semisimple Hopf algebra  $H$ , since they are invariants of the tensor category of representations of  $H$ . This talk is a survey of recent work on computing the values of the indicators for various Hopf algebras, such as the Drinfeld double of a group algebra. (Received September 21, 2015)
