**Priyanka Rajan\*** (rajan@math.ucr.edu), CA. *Almost Non-Negative Curvature On Some Fake  $\mathbb{R}P^n$ s.*

We apply the lifting theorem of Searle and Wilhelm to put metrics of almost non-negative curvature on the exotic  $\mathbb{R}P^6$ s of Hirsch and Milnor and on the analogous exotic  $\mathbb{R}P^{14}$ s. (Received August 15, 2015)
