

1116-VG-2086      **Dusty W. Wilson\*** (dwilson@highline.edu). *A Triune Philosophy of Mathematics.*

What is mathematics and is it discovered or invented? The Humanist, Platonist, and Foundationalist each provide answers. But are the options within the philosophy of mathematics so limited? Rather than viewing and describing mathematics in a mutually exclusive manner, each of these approaches includes components of truth from a greater triune philosophy of mathematics. This talk will introduce this inclusive triune paradigm through which to explore fundamental questions about mathematics. (Received September 21, 2015)
