

1116-VW-2856 **Samaneh G. Hamidi*** (s.hamidi@mathematics.byu.edu), Department of Mathematics,
Brigham Young University, Provo, UT 84604. *Famous Mathematicians From Iran But Whom You
May Not Know.*

Iranians have made several significant contributions to mathematics. However, both Iranian mathematicians and their contributions are not well known in the U.S. In this talk, we will present some of these contributions including the Persian Mathematician and Father of Modern Algebra, Muhammad ibn-Musa Al-Khwarizmi; the Persian Mathematician and Poet, Omar Khayyam; and the Persian Mathematician Nasir al-Din Tusi who formulated the famous law of sines.
