Matthew Lee* (mlee@math.ucr.edu). *Global Weyl Modules for Maximal Parabolics of Twisted Affine Lie Algebras.*

In this talk we will discuss the structure of non standard maximal parabolics of twisted affine Lie algebras, global Weyl modules and the associated commutative associative algebra, \mathbf{A}_λ . Since the global Weyl modules associated with the standard maximal parabolics have found many applications the hope is that these non-standard maximal parabolics will lead to different, but equally interesting applications.
