

1135-H5-3191 **Brian P Katz*** (briankatz@augustana.edu). *(De)Constructing Mathematical Authority*.

Mathematics is a human endeavor, so it involves power and privilege. I think that this exclusionary system is sustained, in part, by our discipline's curious views on authority and the ways that authority is constructed and recreated in mathematics classrooms. This talk will focus on the interconnected issues I have faced while trying to build a classroom community that critiques and resists this system. (Received September 27, 2017)
