Josh M. Beal* (jobeal@iue.edu). A metric for quantifying the accuracy of market indicators. Market indicators, or asset models, have gained in popularity over the last twenty years. Today, their popularity grows at an unprecedented rate, in large part due to the influx of so called Robo-advisors, automated trading engines. In this talk, we develop a metric for quantifying the accuracy of an indicator’s future projections. (Received September 26, 2017)
