Transitioning Learners to Calculus in Community Colleges (NSF IUSE 1625918) is a research project aimed at improving the transition of historically underserved students to and through calculus in two-year colleges by identifying programs, structures, instructional strategies, and key transition points within the mathematics curriculum that influence the success of URM students. This paper draws from data collected from a National Survey of mathematics chairs and case studies of Minority Serving Institutions and presents dimensions and indicators for the TLC3 Model for an equity-minded mathematics program.
