Sloan Evans Despeaux* (despeaux@wcu.edu), Department of Math and CS, Western Carolina University, Cullowhee, NC 28723. Prospering Through Questions and Answers: Almanacs as a space for English mathematicians to prosper, 1775-1850.

English almanacs created a space for mathematicians outside of the university sphere. These mathematicians used this space to display mathematical prowess and achieve renown both locally and nationally. This attention in turn opened the doors to employment opportunities, in particular the Royal Military institutions. (Received September 03, 2019)
