**Judith Flagg Moran\*** ([judith.moran@trincoll.edu](mailto:judith.moran@trincoll.edu)), Director of the Math Center, Trinity College, Summit Street, Hartford, CT 06106. *Developing a QL Program: Do's and Don'ts.*

Trinity College has had a QL program since the establishment of a requirement and general assessment test in 1987. In the intervening years, the program has grown to include four separate foundation courses, several second-tier QL courses, a combined QL-Science course, a First Year Seminar, and modules and QL enrichment within disciplines outside of mathematics including sociology, history, classics, human rights, political science, environmental science, geology and international relations. This talk will describe the components of Trinity's program and difficulties and successes of their implementation. (Received September 25, 2005)
