Wendiann Sethi* (sethiwen@shu.edu), Seton Hall University, Department of Mathematics/Computer Science, 400 South Orange Ave, South Orange, NJ 07079. *How to improve student's performance in Developmental Mathematics course with the use of computer-aided instruction and a personal touch.*

The Developmental Mathematics Program at Seton Hall University offers two classes: Pre-Algebra and Beginning Algebra with the goal to build a firm mathematical foundation for students to take their college-level Mathematics course. Our program is able to enhance quality of instruction and student learning through the use of web-based instruction using MyMathLab in conjunction with short strategy sessions with instructors. Using MyMathLab offers students the opportunity to engage in flexible, individualized and self-directed learning. (Received September 25, 2006)
