

1067-20-2002      **Aliska L. Gibbins\***, 231 W. 18th Ave, Columbus, OH 43210. *Automorphisms of Buildings  
Constructed Via Covering Spaces.*

We discuss automorphisms of buildings constructed via covering spaces as in "Examples of Buildings via Covering Spaces" by Michael Davis. We will offer conditions under which these groups are Weyl transitive, strongly transitive, and construct a pre-root group system via lifts. (Received September 22, 2010)
