George A Anastassiou (ganastss@memphis.edu), University of Memphis, 3725 Norriswood Avenue, Dunn Hall 200, Memphis, TN 38152, and **Razvan A Mezei*** (rmezei@lander.edu), Lander University, 320 Stanley Avenue, Laura Lander Hall 317, Greenwood, SC 29649. *Reverse and Forward Fractional Integral Inequalities*. Preliminary report.

Here we present reverse L_p fractional integral inequalities for left and right Riemann-Liouville, generalized Riemann-Liouville, Hadamard, Erdelyi-Kober and multivariate Riemann-Liouville fractional integrals. Then we derive reverse L_p fractional inequalities regarding the left Riemann-Liouville, the left and right Caputo and the left and right Canavati type fractional derivatives. We finish the article with general forward fractional integral inequalities regarding Erdelyi-Kober and multivariate Riemann-Liouville fractional integrals by involving convexity.
