**Lih-Ing W Roeger\*** ([lih-ing.roeger@ttu.edu](mailto:lih-ing.roeger@ttu.edu)), Department of Mathematics and Statistics, Texas Tech University, Lubbock, TX 79409, and **Sze-Bi Hsu**. *A diamond food web model with one predator two preys and one nutrient resource*. Preliminary report.

We consider a model for a planktonic ecosystem in which two prey species compete for one nutrient resource, and are preyed upon by the same predator. The model exhibits the mixing of both the exploitative and the apparent competitions. We show that under certain conditions, the one species equilibrium is globally stable by constructing a suitable Lyapunov function. (Received September 05, 2012)
