Victor I Piercey* (victorpiercey@ferris.edu), Ferris State University, Department of Mathematics, 820 Campus Drive, ASC 2021, Big Rapids, MI 49307. *Inquiry-Based Learning in a Developmental Mathematics Course*. Preliminary report.

Conducting inquiry-based lessons in a developmental mathematics course presents several challenges, such as addressing student motivation and including all of the traditional topics necessary for the next course. In this talk, I will describe some of my successes, failures, and reflections from my experience using inquiry-based learning in a developmental algebra course. (Received September 17, 2012)
