Scott B. White* (scott.white@saintleo.edu), Saint Leo University, Department of Mathematics and Sciences, MC 2188, Saint Leo, FL 33574, and **Jacci White** (jacci.white@saintleo.edu), Saint Leo University, Department of Mathematics and Sciences, MC 2188, Saint Leo, FL 33574. *A Mathematical Model Of A Volleyball Serve, From Projectile Motion To Fluid Dynamics.*

In this session we will begin with defining the environment to lay it out in a coordinate system. Next we will construct the equations of motion for the optional path before considering wind resistance. Of course, we are not done until we take into account spin and drag and finally, the unstable aerodynamics of the "floater" serve. (Received September 15, 2012)
