James A. Donaldson* (jdonaldson@howard.edu), Department of Mathematics, College of Arts and Sciences, Howard University, Washington, DC 20059. *Mathematics at Howard University: 1900 – 1960*. Preliminary report.

Around the turn of the twentieth century, the discipline of mathematics was in a very early stage of development in the United States of America. The founding of the New York Mathematical Society in 1888 marked the beginning of the ascendance of mathematics in this country. In this paper, we describe some Howard University contributors to mathematics and their contributions during the first six decades of the twentieth century. (Received September 05, 2013)
