Timothy Leake and **Dhruv Ranganathan*** (dhruv.ranganathan@yale.edu). *Brill–Noether Theory of Maximally Symmetric Graphs*.

In this talk I will discuss joint work with Timothy Leake, in which we analyze the Brill–Noether theory of trivalent graphs and multigraphs having largest possible automorphism group. We exhibit Brill–Noether special graphs in any sufficiently large genus, yielding counterexamples to a conjecture of Caporaso. (Received September 09, 2013)
