4265 Kissena BLVD, APT 127, Flushing, NY 11355. *An Example of Quasiconformal Motion.*

I will talk about cross ratio and quasiconformal motion. A counter example of a Sullivan and Thurston's result about quasiconformal motion will be constructed. The extension theorem of quasiconformal motion and Earle-Gardienr-Lakic's equivalence theorem of cross ratio norm and Teichmuller norm will also be discussed in this talk. This is a joint work with Yunping Jiang, Sudeb Mitra, Hiroshige Shiga. (Received September 09, 2013)
