**John Wesley Cain\*** ([jcain2@richmond.edu](mailto:jcain2@richmond.edu), [jcain2@math.harvard.edu](mailto:jcain2@math.harvard.edu)), University of Richmond (Mathematics and CS), Harvard University (Mathematics). *To Make Free Or Not to Make Free—That is the Question.*

In this presentation I will relate some of my experiences in co-authoring two texts on differential equations, one published commercially and the other available open-access. There are advantages and disadvantages to each approach, many of which I had not anticipated. Audience participation is strongly encouraged. (Received September 01, 2013)
