

1096-K1-2500 **Tammy Muhs*** (tammy.muhs@ucf.edu), Department of Mathematics, University of Central Florida, 4393 Andromeda Loop N, Orlando, FL 32816-1364. *A Web Journey Through the History of Mathematics: Two Approaches Part II.*

University of Central Florida's history of mathematics course was adapted to be a web course in fall 2012. The web course was offered for a second time during the fall 2013 semester with a different faculty member assigned to teach the course.

The course was modified based on lessons learned from the initial offering, as well as to accommodate differences in teaching styles.

The history of mathematics course is a required course for all math education majors at the University of Central Florida. This resulted in 90% of the students enrolled in the course having math education as their declared major. An attempt to modify content to address student demographics was made.

This presentation will examine the differences in course focus and assessment between the two semesters as well as lessons learned. (Received September 17, 2013)
