**SoYoung Choi** and **Bo-Hae Im\***, Department of Mathematics, Chung-Ang University, Seoul, 156-756, South Korea. *The zeros of certain weakly holomorphic Drinfeld modular forms and quasi-modular forms.*

Duke and Jenkins constructed a canonical basis for the space of weakly holomorphic modular forms for  $SL_2(\mathbb{Z})$  and investigated the zeros of the basis elements. In this talk, we give an analogy in the Drinfeld setting of the result given by Duke and Jenkins. Also we give a location of zeros of certain quasi-modular forms for  $\Gamma_0^+(N)$ . This is a joint work with SoYoung Choi. (Received August 05, 2014)
