

1106-K1-1337 **Chad Awtrey*** (cawtre@elon.edu). *One approach to researching, presenting, and publishing with undergraduate pure math majors.*

The goal of this talk is to describe the speaker's recent collaborations with undergraduates on projects related to computational Galois theory. Included are discussions of the following: recruiting students, funding sources, tips for beginning the writing process, dissemination outlets, a description of a recent project, and a summary of students' achievements and post-baccalaureate plans. (Received September 12, 2014)
