J. J. Tattersall* (tat@providence.edu), Department of Mathematics, 1 Cunningham Square, Providence, RI 02918. *The Mathematical Department of the Educational Times and Journal of the College of Preceptors.*

A number of significant mathematical journals have included a section devoted to mathematical problems intended to challenge and educate their readers. None has had a more extensive list of contributions and world-wide readership than the monthly periodical *The Educational Times and Journal of the College of Preceptors*. Between 1848 and 1918, there were more than eighteen thousand contributions to the mathematical department from amateur and professional mathematicians. Beginning in 1864, the columns devoted to mathematical problems and solutions was republished in six-month installments as *Mathematical Questions and Solutions from the Educational Times*. We discuss the data collected on contributors and their contributions, and describe plans to put the information into an accessible database. (Received September 17, 2016)
