71302. *Derivations of the Lie algebra of strictly block upper triangular matrices.*

Let F be a field, M_n the Lie algebra of all $n \times n$ matrices over a field F , N the Lie subalgebra of M_n consisting of all strictly block upper triangular matrices in M_n with a given partition. In this talk, we give an explicit description of any derivations of the Lie algebra N over F . (Received September 19, 2016)
