

1125-A5-2404      **Tamas Szabo\*** (szabot@uww.edu), 800 W Main St, Whitewater, WI 53190. *Grading geometry homework in less than 6 hours a week.* Preliminary report.

Writing intensive, proof oriented, upper level geometry courses for prospective middle and high school teachers are not suitable for online homework systems. Several strategies will be discussed including selecting homework problems, encouraging group homework, and utilizing office hours. While examples may come from geometry courses, many ideas are suitable in other undergraduate math courses. (Received September 20, 2016)
