**Kim Ruane\*** ([kim.ruane@tufts.edu](mailto:kim.ruane@tufts.edu)), 503 Boston Avenue, Department of Mathematics, Tufts University, Medford, MA 02155, and **Chris Hruska**. *Semistability of CAT(0) IFP Groups*.

We will discuss how to show CAT(0) groups with the Isolated Flats Property (IFP) are semistable at infinity. It is an open question as to whether all finitely presented groups are semistable at infinity - it is even open as to whether all CAT(0) groups satisfy this property. This result is a corollary of a recent theorem concerning topology of the boundaries of CAT(0) IFP groups (joint work with C. Hruska). (Received September 26, 2017)
