

1135-N5-433 **Ping Ye*** (pye@ung.edu). *Connecting students with the outside world.*

Stepping out of the own comfort zone is not easy for both the students and faculty advisor. PIC Math program provides a great opportunity for faculty advisor to integrate research into the undergraduate classroom and for students to collaborate with the world outside of the University. The experience to go through the whole process turns out to be extremely valuable for everybody. The undergraduate research project of the students will be introduced in this paper.
