Qi Han* (qhan@tamusa.edu), Assistant Professor, Department of Mathematics, Texas A&M University at San Antonio, San Antonio, TX 78224. *How to identify the the Euler-gamma function and the Riemann-zeta function?* Preliminary report.

In this talk we briefly discuss how to identify the Euler-gamma function and the Riemann-zeta function compared to a general complex analytic function of single complex variable. (Received September 16, 2017)
