

1135-VV-3044      **Josh M. Beal\*** ([jobeal@iue.edu](mailto:jobeal@iue.edu)). *A metric for quantifying the accuracy of market indicators.*

*Market indicators*, or asset models, have gained in popularity over the last twenty years. Today, their popularity grows at an unprecedented rate, in large part due to the influx of so called *Robo-advisors*, automated trading engines. In this talk, we develop a metric for quantifying the accuracy of an indicator's future projections. (Received September 26, 2017)
