**Sebastian Hurtado\*** ([shurtados@math.uchicago.edu](mailto:shurtados@math.uchicago.edu)), Chicago, IL 60615. *Rigidity of lattices of Lie groups: Geometry and Dynamics.*

I will discuss some famous theorems about the rigidity of manifolds with a hyperbolic metric and more type geometries (associated to Lie groups). The talk will be informal and require few basic notions about Lie groups. (Received September 07, 2018)
