Don Hadwin and **Weihua Li*** (wli@colum.edu), 45 Northgate Rd, Riverside, IL 60546, and
Wenjing Liu and **Junhao Shen**. *A characterization of tracially nuclear*
C-algebras*. Preliminary report.

We give two characterizations of tracially nuclear C*-algebras. The first is that the finite summand of the second dual is hyperfinite. The second is in terms of a variant of the weak* uniqueness property. The necessary condition holds for all tracially nuclear C*-algebras. When the algebra is separable, we prove the sufficiency.
