

1145-P1-2316      **Sarah V Cook\*** ([sarah.cook@washburn.edu](mailto:sarah.cook@washburn.edu)), Topeka, KS 66609. *Two-Semester College Algebra Stretch Course for Developmental Students*. Preliminary report.

In response to developmental algebra courses with low success rates, the Washburn University Mathematics Department developed a two-semester stretch College Algebra course. This allows students at the developmental level to immediately start learning material for their required math course while also learning essential background skills. This session will discuss the reasons for implementation, course logistics, assessment measures, and success rates for both semesters of the course sequence. (Received September 25, 2018)
