Jennifer Beichman* (jbeichman@smith.edu). *Computing Change with Partial Differential Equations: Running a MAA NREUP at a Liberal Arts College.*

The MAA National Research Experience for Undergraduates Program is a funding source for REUs specifically for underrepresented minority students at the host institution. I, along with another colleague, applied for, were awarded, and ran a program in summer 2019. In this talk, I'll share our application and planning process, the problems we worked on, and share my thoughts on the research impact for myself and the students. (Received September 03, 2019)
