Rosalie Dance* (radance@gmail.com). *Tensor-SUMMA: Outreach to Strengthen the Mathematics Community.*

The MAA's Tensor-SUMMA Program supports outreach by college and university mathematics faculty to undergraduates, middle school and high school students from demographic backgrounds under-represented in mathematics: African-American, Latinx, Native American, and Pacific Islander. In this session, we'll look at a few exemplary projects and consider some successful approaches to outreach to the communities we wish to attract to mathematics. (Received September 01, 2020)
