The interlacing of zeros of Jacobi polynomials $P_n^{(\alpha,\beta)}(x)$ and $P_{{n+1}}^{(\alpha,\beta+1)}(x)$, $\alpha, \beta > -1$, are investigated. We also consider the interlacing properties of the zeros of $P_n^{(\alpha,\beta)}(x)$ and $P_{{n+1}}^{(\alpha+1,\beta+1)}(x)$, $\alpha, \beta > -1$, The special case $\alpha = \beta = \lambda - 1/2$ is also considered.
