

Meeting: 1003, Atlanta, Georgia, MAA CP L1, MAA Session on Using Real-World Data to Illustrate Statistical Concepts, I

1003-L1-277 **Sue B Schou*** (schosue@isu.edu), PO Box 4043, Pocaello, ID 83205. *Using A Web Tool To Collect and Analyze Survey Data.*

For statistics students, data should be relevant and interesting. To encourage student participation, a web survey tool was built for ease of use on the part of instructors and students so that classes could develop their own data sets. Student and faculty experiences will be discussed. If the technology is available, a demonstration of the web tool will be included. (Received September 07, 2004)
