

**Meeting:** 1003, Atlanta, Georgia, MAA CP U1, MAA Session on Mathematical Experiences for Students Outside the Classroom

1003-U1-1191      **John M. Harris\*** ([John.Harris@furman.edu](mailto:John.Harris@furman.edu)), Department of Mathematics, Furman University, Greenville, SC 29613. *This is Jeopardy!*

In each of the past several years, the Southeastern Section of the MAA and the Southeast Atlantic Section of SIAM have sponsored a mathematics Jeopardy competition for undergraduates. The competitions have taken place at regional meetings, and the format and presentation are VERY similar to the television game show. In 2004 teams from twelve schools competed in several rounds of questions (answers), and the competition was a highlight of the meeting. During this talk, I will share information regarding the history of this particular event, the organization process, the format of our competition, and sample answers/questions. (Received October 04, 2004)
