**Erol Akbas\*** ([akbasero@math.uic.edu](mailto:akbasero@math.uic.edu)), Dept of Math, Stat and Comp Science, 851 S Morgan St, MC249, Chicago, IL 60607. *A Presentation For The Automorphisms Of The 3-Sphere That Preserve A Genus Two Heegaard Splitting.*

Scharlemann constructed a connected simplicial 2-complex  $\Gamma$  that the group  $\mathcal{H}$ , isotopy classes of orientation preserving homeomorphisms of  $S^3$  that leave a Heegaard splitting of genus two invariant, acts on. The 2-complex  $\Gamma$  is contractible. Therefore we get a presentation of  $\mathcal{H}$ . (Received September 28, 2005)
